

NEW PRODUCTS

Lens Care Cleaning Products

This complete line of eyewear cleaning products from Allegro Industries features two metal, wall-mounted, refillable cleaning stations. The deluxe low-profile station offers a mirror and lock, and the economy low-profile station is constructed from a white, high-gloss, powder-coated finish that resists wear. Disposable tabletop or wall-mounted cardboard stations and a plastic disposable cleaning station also are available. All stations come with an anti-fog, anti-static solution and lint-free tissues and are available in refill sizes.

Convergence Training Viewer

This convergence training viewer is free, downloadable software designed to streamline access to digital training media and optimize the computer-based training experience. It

provides convenient access to a catalog of computer-based health and safety training modules developed in compliance with federal MSHA and OSHA standards for

industrial, governmental and higher education purposes. It features an easy-to-use platform to download purchased training modules and play them locally, eliminating bandwidth concerns.

Emergency Drench Shower

This emergency drench shower with a new SpinTec showerhead provides a superior washdown for emergency situations when every second counts. The SpinTec showerhead delivers an even distribution of water. The spray pattern rinses more effectively with a higher velocity, resulting in faster removal of hazardous contaminants from the affected user.

Remote Area Lighting System

The 9460 Remote Area Lighting System (RALs) from Pelican Products offers an ecologically responsible alternative to wasteful, generator-powered lights. It features two swiveling telescope masts that each extend to nearly 6 feet; two 360-degree articulated light arrays; and a combined 48 next-generation LEDs and dual power modes (with water-proof switches) that radiate 4,000 lumens in high and 2,000 in low. The system is powered by a rechargeable battery and offers up to 7 hours of peak brightness or 14 hours in low power mode.

Safety Glasses

These ForceFlex safety glasses feature a patented, multi-injection molding of the lens with a flexible Thermo Plastic Urethane (TPU) frame. This construction allows the glasses to achieve a military ballistic-level impact resistance at over 1,000 feet per second. The TPU material allows the frame to flex and fit individual faces from large to small, while the dual material temples combine Thermo Plastic Rubber (TPR) for comfort and polycarbonate for durability. All ForceFlex styles meet military VO test regimen for high velocity impact protection and exceed ANSI Z87.1+.

Ergonomic Lifter/ Transporter

The new Powered Dandy Lift features a battery-powered lift mechanism and is clean, quiet and user-friendly. It provides a convenient way to transport, lift or position loads in high-tech, industrial, retail and office environments. The device features a 24-volt battery and is available in five models with capacities from 220 to 500 lbs., table sizes of 20-by-31.5 inches and 24-by-36 inches and raised heights to 51 inches. Other features include a battery status indicator and onboard charger, full shielding of all electrical components, smooth-rolling casters, parking locks and a comfort-shaped handle.

Safety Gloves

The new Metal-Tec glove from Wells Lamont combines high performance fibers and stainless steel filament used to offer tensile strength. It is plaited with cotton for additional comfort and offers greater protection against cuts and abrasions than comparable Aramid gloves. The dark color conceals dirt and grime, increasing the usage cycle of the glove. The Metal-Tec is ambidextrous, available in sizes small through extra large and is made in the United States.
