

Smart Surge Protector Automatically Turns Your Peripherals Off – Even If You Forget! *Saves on your energy bill, too!*

- ▶ The Smart Strip makes shut down fast, easy & complete
- ▶ Turn on/off your computer and your peripherals turn on/off automatically
- ▶ Works with the Sleep Mode of all computers
- ▶ No more bending over to turn off your surge protector
- ▶ No more turning off multiple switches
- ▶ Peripherals that do not have power switches are not a problem anymore
- ▶ Stop wasting 260 watts or more every hour (as per the Long Island Power Authority)
- ▶ Stop each transformer block from covering up to four power strip outlets, even when the device is off
- ▶ Save more energy than replacing your entire computer system
- ▶ Cuts an average of 113 kilowatts per month from your electric bill
- ▶ Pays for itself in energy savings in as little as six weeks – three months on average
